  "importance_p": 72,
  "abstract": "An image processing apparatus includes an obtaining unit to obtain image data, a judgment unit to judge whether a barcode is included in the image data for each piece of band data corresponding to a printable region by scanning a printing unit, the barcode formed of a region i...",
  "claim_1": "1. An image processing apparatus comprising:¥r¥nan obtaining unit configured to obtain image data;¥r¥na judgment unit configured to judge whether a barcode is included in the obtained image data for each piece of band data corresponding to a region printable by scanning a printing unit including a plurality of printing elements once, the barcode being formed of a region in which bars are arranged side-by-side in a direction in which the printing unit is scanned over a printing medium, wherein, in a case when a color...",
